Installation proposal

Proposed air-source heat pump

Mitsubishi Electric

Ecodan R290 PUZ-WZ60VAA

Nominal heat pump output: 6 kW

Design flow temperature: 45 C

Stated design heat loss: 4.7 kW at -2 C outdoors

Included equipment

Hot-water cylinder: 200 L unvented

Buffer tank: none

Scope

Replace the existing gas boiler; connect the heating and hot water.

Allow for radiator upgrades, electrical work and commissioning.

All specifications and prices are invented for the hackathon demo.

Equipment names match the project's public manufacturer datasheet seed.

Price breakdown and grant treatment follow on page 2.
